Kurt Malzahn  
 City of Ludington WTP Supt.  
 231-843-8830

The City of Ludington has awarded a maintenance contract to Utility Service Co. to repaint the interior and exterior of the City's existing water tower located at 815 N. Lakeview Street. A full containment system will be constructed around the exterior of the water tower. This containment (large enclosure) will contain the majority of the dust and debris from the sand blasting of the exterior of the tower. Upon completion of the sandblasting, the surface will be primed and painted.

If your property is located close to the water tower site, you may notice some dust and odors in the air from the work. These are not harmful to you; however, you may want to keep your windows closed on your home and vehicle during the day to prevent dust from entering your home or vehicle. Utility Service Co. is fully aware of all regulatory requirements of containment relative to this type of project.

Working hours will be limited to the hours of 7:00 am to 7:00 pm Monday thru Saturday. The contractor may elect to work some Sundays, but Sunday work will be limited to non-noise disturbing activities (i.e. clean up, painting, etc.). The sand blasting work will be somewhat loud but will be done between 7:00 am and 7:00 pm Monday thru Saturday.

Throughout the project, one may notice slight water pressure fluctuations from time to time due to this particular water tower being out of service.

#### Project Timeline

Construction will begin the week of May 16<sup>th</sup>, 2010 and be completed in July, weather permitting.

#### Caution:

Please use caution when traveling or walking adjacent to the construction zone on N. Lakeview Street and Gaylord Avenue. It is important to remember that large construction equipment is dangerous and operators are concentrating on the job at hand. Please do not approach the equipment or construction site and instruct children to stay away. Unauthorized personnel are NOT allowed on the construction site.

If you have any questions, concerns, or special needs throughout the project, please contact Kurt Malzahn, Water Treatment Plant Superintendent at 231-843-8830. If you have an emergency regarding this project, please contact one of the contacts listed to the side.

We sincerely thank you in advance for your patience throughout this project.
